## The 21<sup>st</sup> Century Fax Machine is in Your Hands

**Send and receive confidential documents from any device with SecureFax.**

Whether your office is on the road, in your living room, or spread across multiple locations throughout the world, you can close important business deals, review confidential medical records, or share critical documents immediately from any device. Online faxing not only frees you from outdated hardware and the complications of traditional phone lines, it also gives you encryption and HIPAA-compliant security throughout your entire organization.

# Transfer Important Documents From Anywhere

No matter where you do business, and no matter the device, your documents will be securely sent to their intended destination. SecureFax's convenient web portal allows you to use the device of your choice saving you equipment costs and office space.
